

# *House and Bus*

1. Find an empty pasta box. It's better if it has a small window, but you could always cut one out if you want.

**2.** Carefully unfold it and glue the sides just like they were, but inside out. Also, take out the plastic window covering, and glue it on the inside.

**3.** For the roof, I just use cardboard from a cereal box. If you're making a bus, cut out some round wheels, and glue them on the sides.

**4.** Finally, it's time to decorate. Use tempera or gouache paint, because they have a rich and vivid opaque color that perfectly cover cardboard.

**5.** This is another example. This little house was made into a christmas ornament.

**6.** Another option is to glue on colorful paper or patterns. And if you place a small light inside the house, it makes a nice nightlight!
