

Mouse

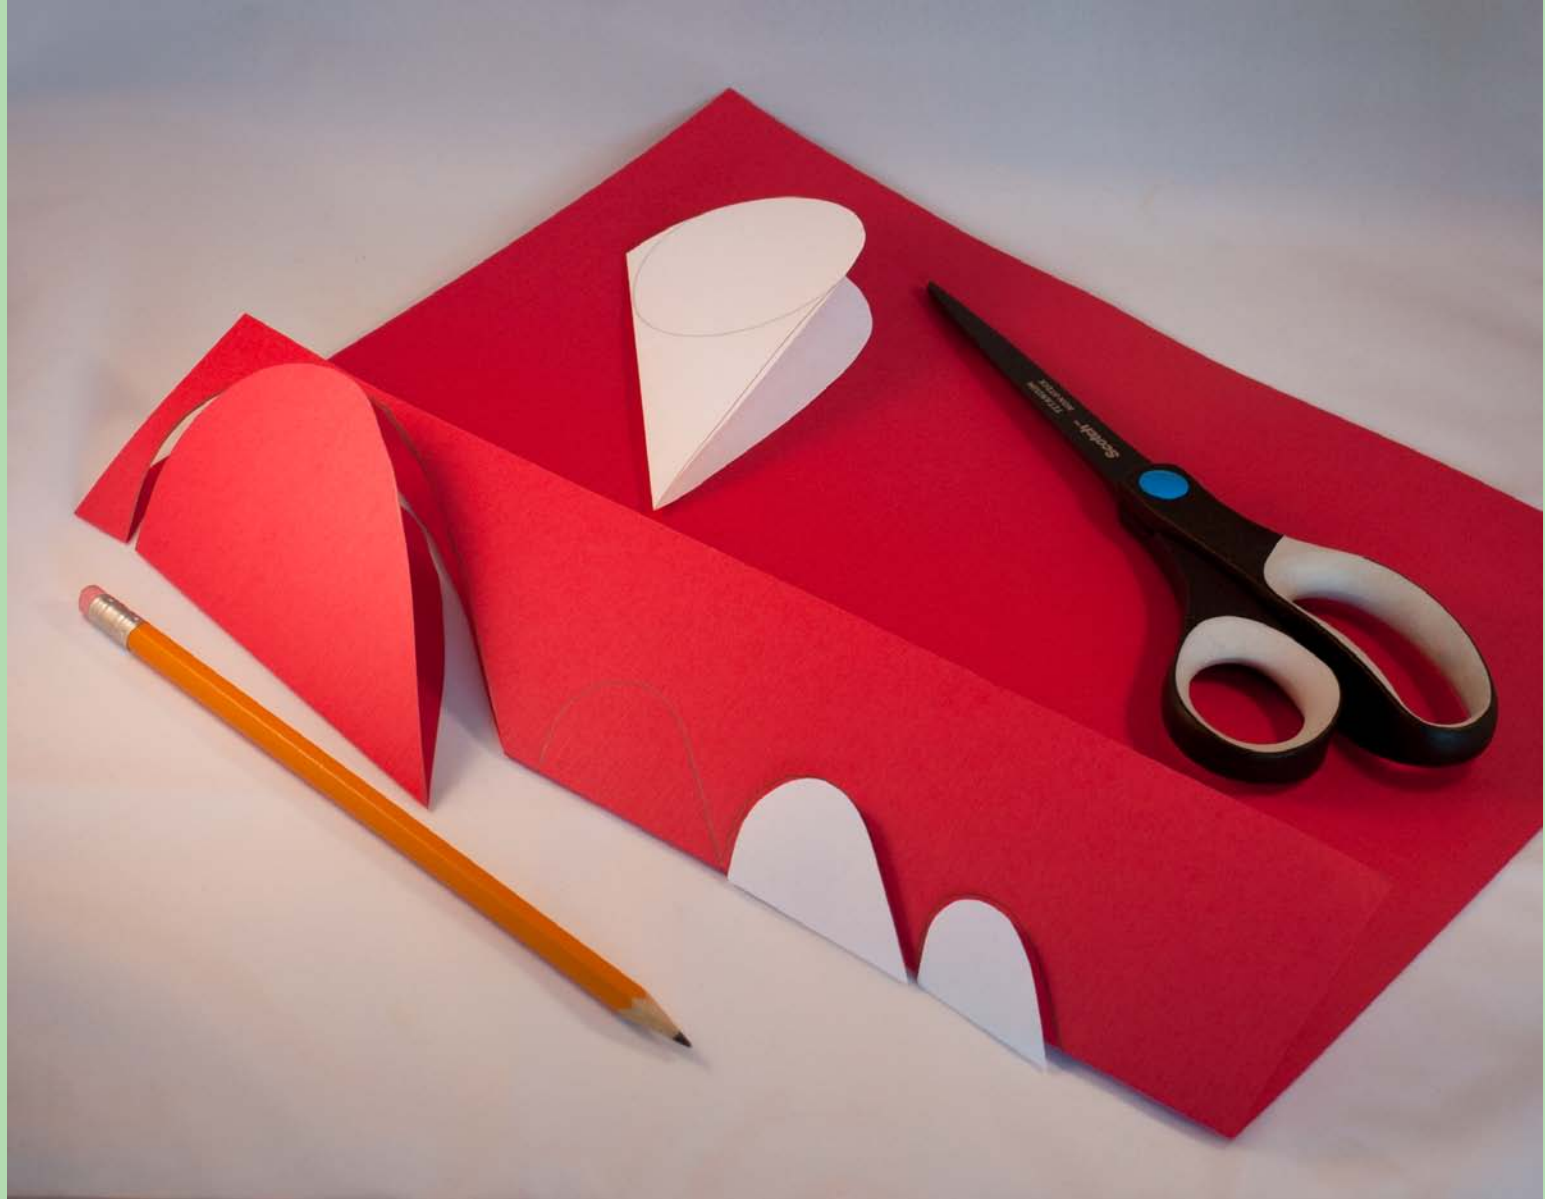

1. Fold a sheet of paper in half and cut out three hearts as shown. They will be the templates for the body, ears and tail.

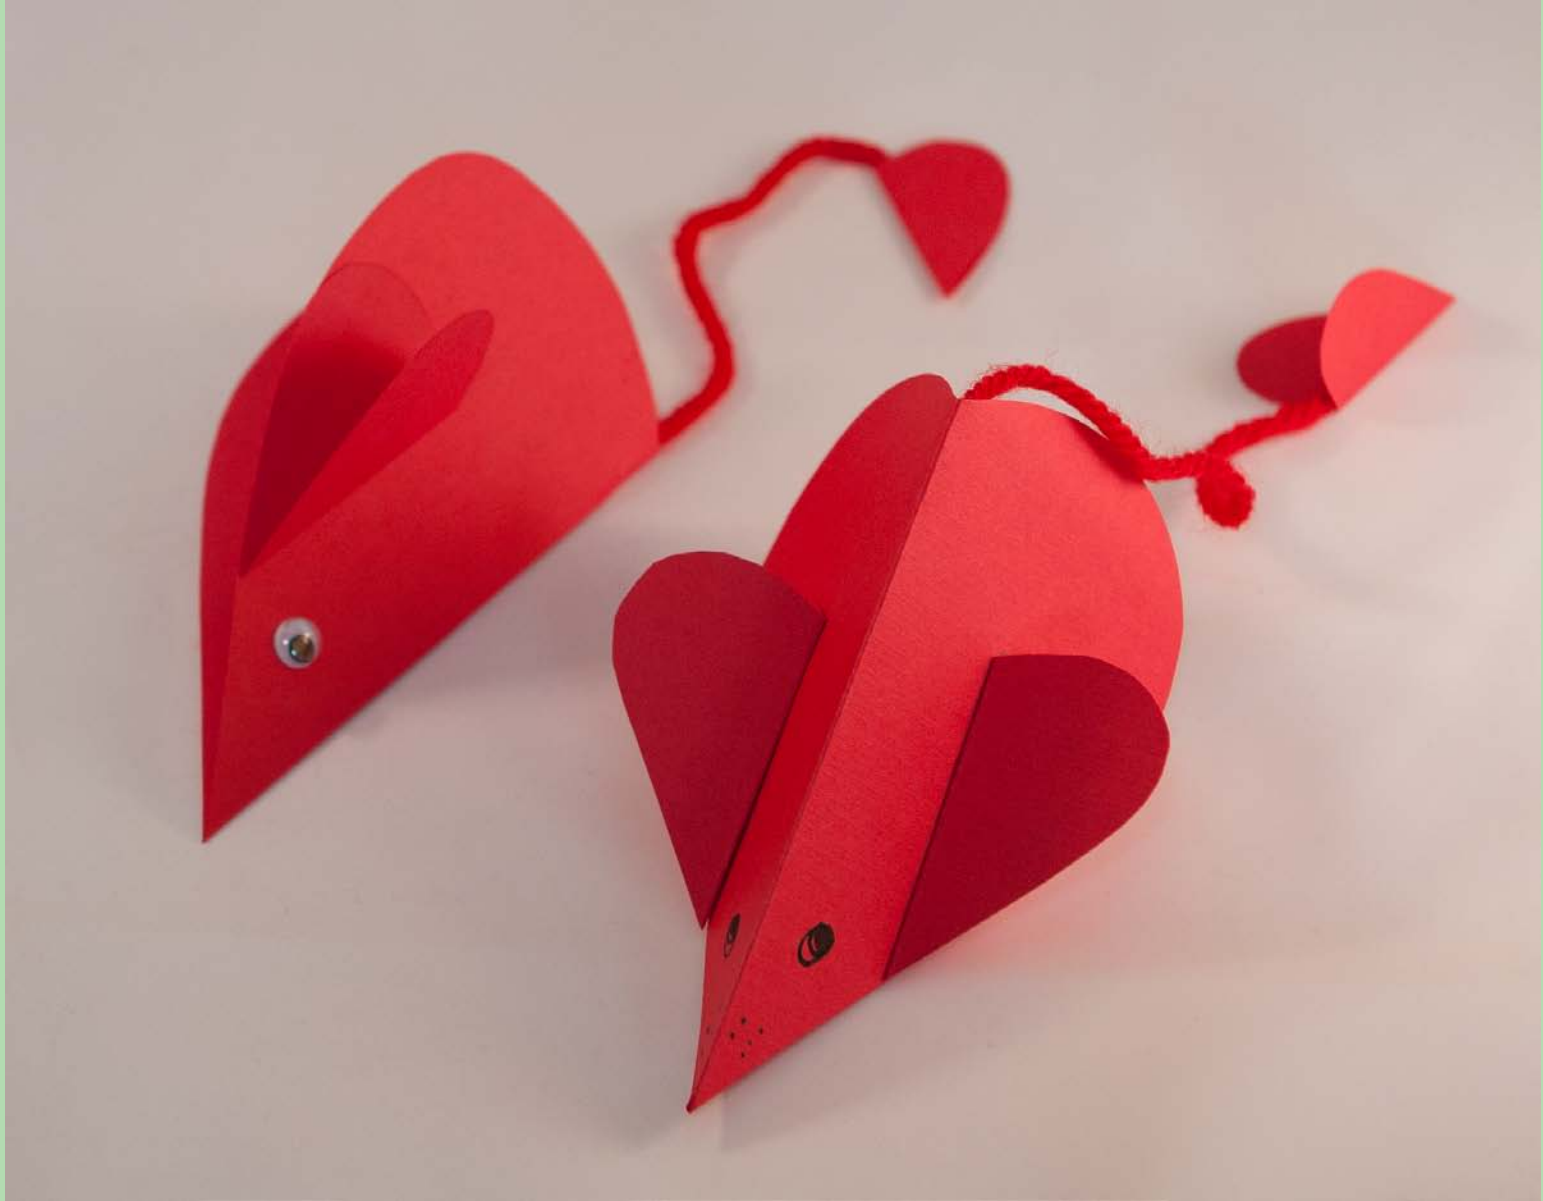

2. Take a thick sheet of colored paper and fold it to match your templates. Use scissors and a ruler to press the line before folding.

3. Now trace the template outlines with a pencil and cut them out. Don't forget that you'll need two ears.

4. Now it's time to glue them together. Make sure that the ears are at the same level. Then you can draw or glue on the eyes.

5. These mice are made from hearts so they would make great Valentines. But it can also serve as a toy or a bookmark.
