1. You will need: glue, scissors, tape, cardboard, tinfoil, string, and safety pins.

2. First, draw a small simple sketch on a small piece of cardboard. Next, carefully glue the string along all the lines.

3. When the glue is completely dry, cut your cardboard into the shape of your pin.

4. Now, carefully press the tin foil onto the pin. Cut off excess foil and wrap it around the edges of the cardboard.

5. Then, using tape, secure the foil on the back of your pin.

6. Place the safety pin in the center, and fasten it with a piece of tape.

7. The pin is ready! You can use the same method to create accessories for costumes (crowns, swords, belts, etc.) and crafts like jewelry boxes.
