

*Windmill*

1. Print out the template and prepare everything you see on this picture: a paper roll, glue, a fastener, scissors and crayons.

**2.** Color the template. Keep in mind that you can create your own pattern. Then use scissors to cut it along the line in the middle of the page.

**3.** Then you'll make the blades for the windmill. Fold the paper as shown along the dotted line.

**4.** Use the pattern to cut out the blades from colored paper.

**5.** Now put some glue on the back side of the paper and attach it starting with the blank side. Cut off excess paper if needed.

**6.** Use something sharp to make a hole in the center of the blades and at the small "x" on the roll. Attach the blades with the fastener.

7. You should end up with a windmill similar to these ones.
